SCOPE OF WORKS No. 2023-04

Project Title : **TERMITE AND RODENT CONTROL**

Location : **WVSU-Januiay Campus
Locsin Street, Janiuay, Iloilo**

SCOPE OF WORKS:

1. Soil poisoning/treatment of the soil within and surrounding the building.
 - Soil Poisoning Through cordoning method is done by injecting liquid solution using Soil Injector and Power Sprayer. The chemicals that are being applied shall serve as chemical barrier against subterranean termites' entry through soil.
2. Termite Abatement Maintenance Program
 - Residual Spraying – on the infested and non-infested portions and other areas possible for habitation of subterranean termites, dampwood termites and drywood termites.
 - Trophallaxis Method- treatment of all infested areas, materials, earthen mud tunnels and crevices especially cracks and all possible passages of termite by blowing of slow acting concentrate with long residual effect powder form of chemicals. It will be disseminated by termite themselves through their social action that will eventually kill the entire termite colony.
3. Termite mound demolition and treatment.
 - Termite mounds are the homes of subterranean termites where the termite queen lives and lay eggs. Mounds must be destroy thoroughly and treat the area.
4. Rodent abatement and maintenance
 - The work is mainly for control of all kinds of rodents such as rats and mice which are equally filthy, nuisance and destructive to both human and properties.
